

AULIA MEI AZIZI

Software Development Engineer in Test (SDET)

Jakarta, Indonesia | 082130315528 | auliameiazizi@gmail.com

SUMMARY

SDET with 6+ years in QA (3.5 years as SDET) specializing in API and web UI automation with Java and Playwright. Scaled squad-level automation coverage to 60%+, including end-to-end coverage for complex new features. Defined deployment gateway criteria and CI/CD testability standards in partnership with developers at Blibli.com.

EXPERIENCE

Software Development Engineer in Test (SDET) | PT Global Digital Niaga (Blibli)

Jakarta, Indonesia | January 2022 – October 2025

Domains: Blibli Tukar Tambah (trade-in marketplace) and SiPlah (B2G e-commerce catalog platform)

- Designed and implemented API and web UI automation frameworks for sprint features and release cycles using Java and Playwright, achieving over 60% automation coverage at the squad level.
- Built end-to-end automated test suites covering multiple integrated services for complex new features, coordinating with developers to identify testable code paths and trigger conditions.
- Integrated automated test suites into CI/CD pipelines via Jenkins and Stash SCM, enforcing deployment gateway criteria so new versions only ship when all test thresholds are met.
- Defined and maintained deployment gateway criteria to meet release standards per sprint, directly reducing production defects.
- Created and executed comprehensive test plans and test cases for both manual and automated testing across all product releases.

IT Quality Assurance | PT Kognitif Skema Indonesia

Jakarta, Indonesia | November 2018 – January 2022

- Manually tested [web/mobile] releases against functional documentation before each deployment, coordinating with development and client teams to sign off on release readiness
- Analyzed product workflows and related documentation to develop test strategies aligned with functional specifications (FSD) and technical specifications (TSD).
- Verified and replicated user-reported bugs in Jira across test environments, and tested newly developed applications and patches prior to deployment.
- Acted as QA bridge between the overseas vendor dev team and client/user teams — configuring systems, escalating and retesting bugs, and validating new builds before release

PROJECTS

Playwright Java Automation - The Jakarta Post

https://github.com/almezi/pw_java_thejakartapostcom

Tech Stack: Java, Playwright

Description: Automated Web UI testing suite for The Jakarta Post news portal using Playwright Java, implementing structured Page Object Model architecture and cross-browser user journey validations.

Playwright Java API Automation - JSONPlaceholder

https://github.com/almezi/pw_java_jsonplaceholder.typicode.com

Tech Stack: Java, Playwright API Request, REST API

Description: Automated REST API testing suite for JSONPlaceholder endpoints leveraging Playwright Java's APIRequestContext to validate HTTP response codes, payload schemas, and end-to-end CRUD operations.

EDUCATION

Bachelor of Information Systems (GPA 3.6)

Universitas Bina Nusantara | 2020 – 2022

Associate's Degree in Management Information Systems (GPA 3.4)

Universitas Telkom | 2015 – 2018

SKILLS

- **Languages:** Java
- **Automation:** Selenium, Playwright, API Automation, UI Automation, Internal Automation Framework
- **CI/CD & Tools:** Jenkins, Stash SCM, Jira
- **Databases:** SQL, NoSQL
- **Process:** Test Planning, Manual Testing, Deployment Gateway Criteria, Stakeholder Management
