AULIA MEI AZIZI

Software Development Engineer in Test (SDET)

📍 Jakarta, Indonesia 📞 082130315528 ✉️ auliameiazizi@gmail.com 🔗 github.com/almezi

PROFESSIONAL SUMMARY

SDET with 6+ years in QA (3.5 years dedicated as SDET) specializing in API and Web UI test automation with Java 21 and Playwright. Proven track record of scaling squad-level automation coverage beyond 60%, expanding test depth, and uncovering 15+ previously untapped regression edge cases. Experienced in setting up deployment gateway criteria and shift-left testability standards in direct collaboration with development teams at Blibli. Standardized end-to-end framework execution with BDD, Appium, WebdriverIO, CI/CD pipelines, and Kibana observability.

CORE COMPETENCIES & TECHNICAL SKILLS

Languages:	Java 21, TypeScript, Kotlin, SQL
Automation Frameworks:	Playwright (Java & TypeScript), Cucumber BDD, JUnit 5, Selenium, Appium, WebdriverIO, REST API Automation, Web UI & Mobile Automation
CI/CD & DevOps:	Jenkins, GitHub Actions, GitLab CI, Stash SCM, Maven CLI
Databases & Tools:	PostgreSQL, SQL, NoSQL, Kibana / ELK Stack, Jira
QA Methodology:	Test Strategy & Planning, Deployment Gateway Criteria, Shift-Left Testing, Defect Lifecycle Management, Stakeholder Management

PROFESSIONAL EXPERIENCE

Software Development Engineer in Test (SDET)

Jan 2022 – Oct 2025

PT Global Digital Niaga (Blibli) — Jakarta, Indonesia

Domains: Blibli Tukar Tambah (Trade-in Marketplace) & SiPlah (B2G E-Commerce Catalog Platform)

- Architected and implemented high-throughput API and Web UI test automation frameworks using **Java 21** and **Playwright** on top of an internal Selenium-based fork, driving squad automation coverage to **60%+**.
- Uncovered **15+ critical regression and edge-case scenarios** previously missed in manual cycles; integrated these into the automated suite to enhance coverage depth and significantly decrease regression cycle duration.
- Designed integrated end-to-end multi-service test suites for complex product releases, partnering directly with developers to identify trigger conditions and testable code paths.
- Automated integration into **CI/CD pipelines via Jenkins** and Stash SCM, enforcing strict deployment gateway criteria to restrict non-compliant builds from shipping.
- Formulated deployment criteria that reduced production defect leaks across multi-sprint releases.
- Authored comprehensive master test strategies, test suites, and manual execution protocols for major product features.

IT Quality Assurance Specialist

Nov 2018 – Jan 2022

PT Kognitif Skema Indonesia — Jakarta, Indonesia

- Executed functional and non-functional web/mobile testing against technical specifications (TSD) and functional requirement docs (FSD) prior to production rollouts.
- Served as primary QA liaison between overseas vendor developers and local product stakeholders, validating candidate builds and facilitating defect triage in Jira.

PROFESSIONAL EXPERIENCE (CONTINUED)

PT Kognitif Skema Indonesia (Continued)

- Conducted end-to-end bug replication, root-cause triage, and patch verification across staging and pre-production environments.
- Coordinated sign-off workflows with client management, ensuring high software stability for external business partners.

INDEPENDENT SDET & ENGINEERING PROJECTS

Active developer and open-source contributor building production-grade test automation frameworks and tools (Available on GitHub: **github.com/almezi**):

saucedemocom-ui-playwright — Java 21 | Playwright | Cucumber BDD | JUnit 5

Robust Web UI automation framework featuring Page Object Model (POM), thread-safe scenario context isolation, and automated HTML reporting for e-commerce workflows.

petstore-swagger-io-playwright — Java 21 | Playwright API | AssertJ | Jackson

RESTful API test automation suite built for schema validation, automated CRUD operation verifications, and custom assertion reporting.

saku-appium — Appium | WebdriverIO | TypeScript

Cross-platform mobile automation suite supporting dual Android & iOS execution, test-tag locator strategy, parallel device runner, and app state isolation.

SimpleMoneyTracker-KT — Kotlin Multiplatform | Jetpack Compose

Full-stack mobile application supporting Android and iOS, implementing IDR currency formatting, Gradle version catalogs, and release pipeline scripting.

AI-CICD & Observability Suite — Java 21 | Maven CLI | ELK / Kibana

Automated project health analyzer CLI tool built to inspect code and pipeline health. Utilizes Kibana/ELK log parsing to analyze staging & production failure patterns.

EDUCATION

Bachelor of Information Systems — 2020 – 2022
Universitas Bina Nusantara (BINUS)

Associate's Degree in Management Information Systems — 2015 – 2018
Universitas Telkom
